

A Global electrophilicity

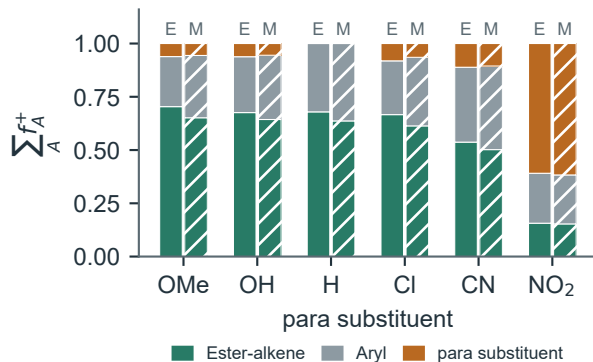

B Response at the β -carbon (C6)

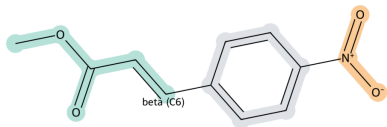

C OH/Cl order depends on the partition

D Fragment partition of the unit response

E Fragment definition, methyl 4-nitrocinnamate

Methyl 4-nitrocinnamate, fixed-geometry check jobs

Nitro fragment	0.609 (ESP)	0.617 (Mulliken)
Aryl ring	0.235 (ESP)	0.230 (Mulliken)
Ester-alkene	0.156 (ESP)	0.153 (Mulliken)

Fragment sums include attached hydrogens and total one electron. They are signed charge-response partitions, not orbital populations or probabilities.
